

vlingo

About vlingo

Why tap when you can talk? Now you can talk to your phone and it understands you!

Vlingo is a voice-powered user interface that unlocks access to mobile phone wireless data services. vlingo for BlackBerry smartphones allows users to speak into their device and have many popular applications carry out their respective functions. This includes dialing your phone, sending an email or SMS, creating and saving a memo or task, opening a web browser and performing a web search, composing a social-networking status message and more.

It's all possible with technology by vlingo — revolutionary software that translates your voice into text like nothing before.

How Does it Work?

- Press a button and speak into your phone
- vlingo will understand your request and perform the requested task
- Edit your request as needed

What does it cost?

Free
(Media Bundle Package recommend)

Lifestyle:

▶ Work Play Family

Operating System Requirements:

Windows ▶ Blackberry Symbian

How do I get it on my phone?

- Just text the word vlingo to 95495 or go to <http://www.vlingo.com> from your computer and enter some basic account information
- A text message will be sent to your phone that will enable you to download vlingo right to your phone.
